Yenilięe, Kaliteye ve Geleceęe Adanmışlık

İstanbul Esenyurt'taki merkez fabrikamızın ardından, İzmir'de 10.000 m² alan üzerine kurduğumuz ikinci ve modern tesisimizle üretim gücümüzü daha da ileriye taşıyoruz.

Yeni fabrikamız, çevre dostu **green energy** (yeşil enerji) sistemiyle çalışan altyapısı sayesinde, sadece üretimde değil, sürdürülebilirlikte de sektöre öncülük ediyor.

Yüksek kalite standartlarımızı, yenilikçi çözümlerle birleştirerek; plastik sektöründe güvenilir bir iş ortağı olmaya devam ediyoruz.

Değerli iş ortaklarımız için geliştirdiğimiz ürünler hakkında detaylı bilgileri bu katalogta bulacaksınız.

Commitment to Innovation, Quality, and the Future

Following our central factory in Esenyurt, Istanbul, we are taking our production power even further with our second and modern facility, which we established on an area of 10,000 m² in Izmir.

With an infrastructure powered by an eco-friendly **green energy** system, our new plant leads the industry not only in production but also in sustainability.

By combining high quality standards with innovative solutions, we continue to be a trusted partner in the plastics industry.

In this catalog, you will find detailed information on the products we have developed for our valued business partners.

Triton Temizlik Seti iki farklı hazneye sahiptir. Bunlardan bir tanesi temiz su için, diğeri ise kirli su içindir. Kullanım esnasında bu ikisi birbirine karışmaz. Sıyrıcı bıçaklar mop üzerindeki kirli suyu tahliye ederken diğ taraftan mop üzerine temiz su verilir. Mop kirli su ile temas etmediği için, her zaman temiz su ile temizlik yapmaya devam edersiniz. 170° dönebilen sap tasarımı sayesinde koltuk, kanepeler altına vb kolaylıkla ulaşabilirsiniz.

The Triton Cleaning Set has two different chambers. One of them is for clean water and the other is for dirty water. During use, these two do not mix with each other. While the scraper apparatus discharges the dirty water on the mop, on the other hand, clean water is supplied to the mop. Since the mop does not come into contact with dirty water, you always continue to clean with clean water. With its 170° rotating handle design, it can be placed under armchairs, sofas, etc. you can reach easily.

proff®

YORULMADAN

Pedal tahrikli santrifüj, mopun çok daha hızlı ve verimli kurumasını sağlar. Kol gücü gerektirmediği için çok daha az yorucudur. İsteddiğiniz kuruluk seviyesine ulaşana kadar pedala basmanız yeterlidir.

EFFORTLESS

Pedal driven centrifuge allows the mop to dry much faster and more efficiently. It is much less tiring as it does not require arm strength. Just press the pedal until you reach the dryness level you want.

PVA Mop üzerinde bulunan kanallar yüzeyde bulunan kirleri içine hapseder. Ayrıca çok daha fazla yüzeyin zemine temas etmesini sağlayarak daha hızlı bir temizlik sağlar.

The vessels found on PVA Mop keeps the dirt inside it. Also if you are aware of not placing too much pressure on the surface, a faster cleaning process is guaranteed.
