Triton Temizlik Seti iki farklı hazneye sahiptir. Bunlardan bir tanesi temiz su için, diğeri ise kirli su içindir. Kullanım esnasında bu ikisi birbirine karışmaz. Sıyrıcı bıçaklar mop üzerindeki kirli suyu tahliye ederken diğertaraf tan mop üzerine temiz su verilir. Mop kirli su ile temas etmediği için, her zaman temiz su ile temizlik yapmaya devam edersiniz. 170° dönebilen sap tasarımı sayesinde koltuk, kanepelerine vb kolaylıkla ulaşabilirsiniz.

*The Triton Cleaning Set has two different chambers. One of them is for clean water and the other is for dirty water. During use, these two do not mix with each other. While the scraper apparatus discharges the dirty water on the mop, on the other hand, clean water is supplied to the mop. Since the mop does not come into contact with dirty water, you always continue to clean with clean water. With its 170° rotating handle design, it can be placed under armchairs, sofas, etc. you can reach easily.*

#### YORULMADAN

Pedal tahrikli santrifüj, mopun çok daha hızlı ve verimli kurumasını sağlar. Kol gücü gerektirmediği için çok daha az yorucudur. İsteddiğiniz kuruluk seviyesine ulaşana kadar pedala basmanız yeterlidir.

#### EFFORTLESS

*Pedal driven centrifuge allows the mop to dry much faster and more efficiently. It is much less tiring as it does not require arm strength. Just press the pedal until you reach the dryness level you want.*

Slim PVA Mop hafif, kolay taşınabilir yapısı ile son derece kullanışlıdır. PVA mopu ile zorlu kirleri derinlemesine ve kolayca temizlemenize imkan tanır. Sıkma sistemi sayesinde temizlediğiniz yüzeyde su lekeleri bırakmaz.

*Slim PVA Mop's light and mobile design makes it practical to the highest levels. PVA Mop allows you to get rid of the dirt and clean easily. The squeezing system won't leave any water stains on the cleaned surfaces*

PVA Mop üzerinde bulunan kanallar yüzeyde bulunan kirleri içine hapseder. Ayrıca çok daha fazla yüzeyin zemine temas etmesini sağlayarak daha hızlı bir temizlik sağlar.

*The vessels found on PVA Mop keeps the dirt inside it. Also if you are aware of not placing too much pressure on the surface, a faster cleaning process is guaranteed.*
